# SEP sesam Novell

## Data Security for Novell Products: Powerful, Reliable, Available

### SEP

SEP is a leading pioneer in network-wide and cross platform data availability software. Since 1992 SEP has developed industry-leading technology for data security and has integrated this into one of the fastest and most reliable data back up solutions available today. With SEP`s proven products for back up, recovery and disaster recovery data security and availability has become a safe, reliable and extremely affordable solution for today`s multinational companies.

### All Novell

SEP sesam is the perfect solution for Novell environments whether exclusively Novell Shops or for IT Departments running multiple Operating Systems. SEP sesam, now available for all of Novell's products including Netware, OES2, SUSE Linux Enterprise Server (SLES), Open Workgroup Suite and GroupWise, is second to none.

### Certified

SEP sesam has been certified by Novell and SEP sesam's uncompromising software standards and design means SEP sesam is a perfect solution for enterprise data back up, restore and disaster recovery. SEP offers native server support for all Novell O/S (and all other Linux derivatives), Windows, UNIX and BSD 5. SEP also supports one of the industry's greatest number of client O/S's.

### Every Single Email

SEP sesam groupware online module for Novell GroupWise not only backs up GroupWise, it allows a user with SysAdmin assistance to restore individual mail messages that may have been lost or inadvertently deleted. The uninterrupted back up of a Novell GroupWise Server ensures permanent 24x7 access to the groupware server.

### Novell Data: Simply Fast

Using Novell GroupWise the amount of data backed up is increasing exponentially. For fast and safe back ups from multiple SEP sesam client sources the SEP sesam multiplexing technology with up to 64 parallel streams allows the System Manager to design a back up strategy that fits the needs of the enterprise. Back ups are finished in the least possible time. SEP sesam also supports LAN free back ups and restores. SEP sesam Direct Access accelerates restores. SEP sesam knows where to find the data to be restored without scanning the back up media.

### The Solution for your Novell Environment

**Reliable back ups using Novell TSA's.** Scheduled back ups use Novell TSA technology. Online back up and restore capability allows system administrators to secure NSS, eDirectory and GroupWise files.

**eDirectory.** Back up and restore eDirectory files and settings.

**Novell Storage Services (NSS).** NSS volumes are easily restored in the event they are lost or corrupted or even if an individual file needs to be restored with all permissions.

**OES2 cluster support.** NSS Cluster and OES2 cluster support is available today, and supports both OES Linux and OES Netware. Install SEP sesam on the OES 2 cluster and back up your critical data now!

**Simple installation.** Provides easy, management interface-based installation for servers and clients whether running Novell OES2 or other O/S.
